

WORMLOVERS

commercial worm farms

FLEXIBILITY

Wormlovers has a flexible service model for multiple bins - pay for them outright, hire them, service them yourself, or get us to service them for you on a regular basis.

Our multibin racking system keeps the worm farms secure, tidy and stationary. Racks can be custom built to suit the space available and number of bins required.

We can create a delivery and service model to meet your needs...

..all you have to do is **love the worms.**

Managing organic waste sustainably, and reducing quantities going to land fill, is a growing concern for businesses and organisations.

Wormlovers are a leading worm farming service provider. We are able to assist with worm farming and waste reduction in your organisation, and with our wealth of experience can ensure the efficiency, quality and success of your worm farming initiatives.

Wormlovers are Australian importers of the revolutionary Hungry Bin worm farm. This unit is clean, simple to use and can process large amounts of organic waste per day.

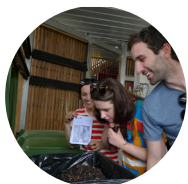

This is a proven processing system is currently working everywhere from single person homes, to commercial kitchens, to a 1200 person prison.

The Hungry Bin is the basis of our onsite solution for organic waste processing. Multiple bins can be used to meet the waste output.

Wormlovers specialise in container gardening and roof top gardens, including the supply of highly efficient planter box systems with low maintenance, water and fertiliser requirements.

Staff engagement and upskilling is essential to the success of on site solutions. Wormlovers offer staff training and ongoing support for worm farm systems.

Wormlovers carry out workshops and demonstrations on behalf of their clients to key stakeholders, at events, or to the public to promote their sustainable practices.

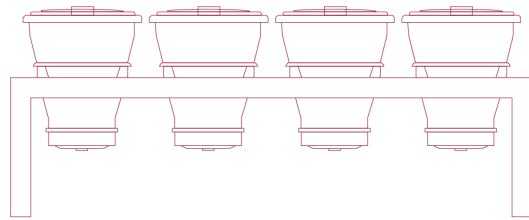

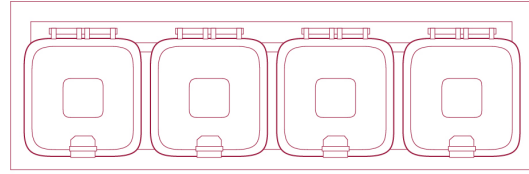

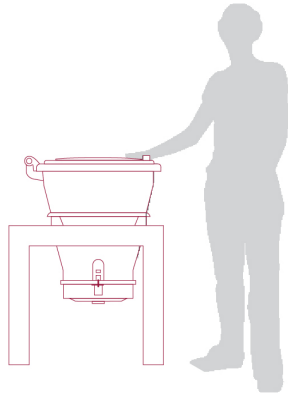

WORMLOVERS

Wormlovers was founded in 2002 to supply worm products to the public, and provide worm farming (vermiculture) services to councils, schools, businesses and homes.

Worm farming on any scale - from the domestic to medium scale and beyond - can make significant contributions to waste reduction, nutrient cycling, food production, improved plant health and reductions in carbon emissions.

Contact us to discuss a sustainable waste solution for your organisation.
